

Canva features I wish I knew about sooner

7 OF THE BEST CANVA HACKS!

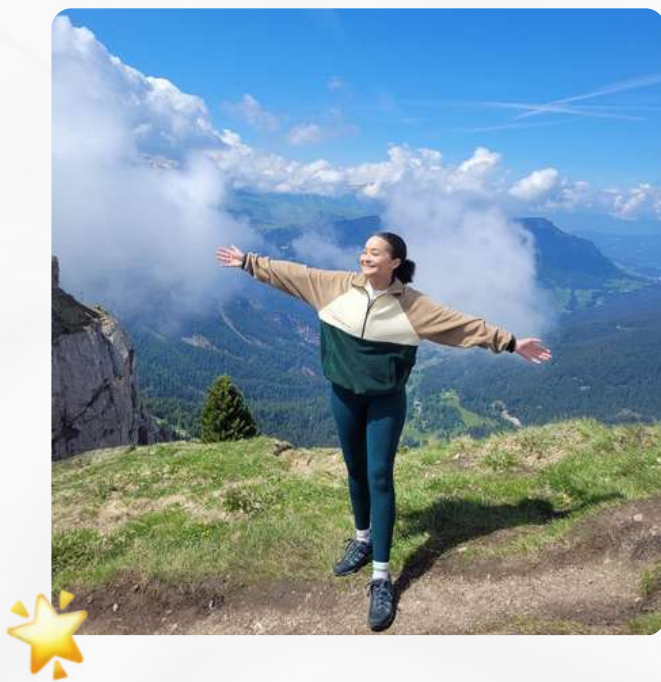

PART 2

1/ Magic grab

Move objects in a photo without messing up the background.

Click your image > Edit > Magic Grab > select what you want to move & then drag it wherever you want.

Great for repositioning people, products, or text in seconds.

2/ Keyboard shortcuts

Me realising this existed:

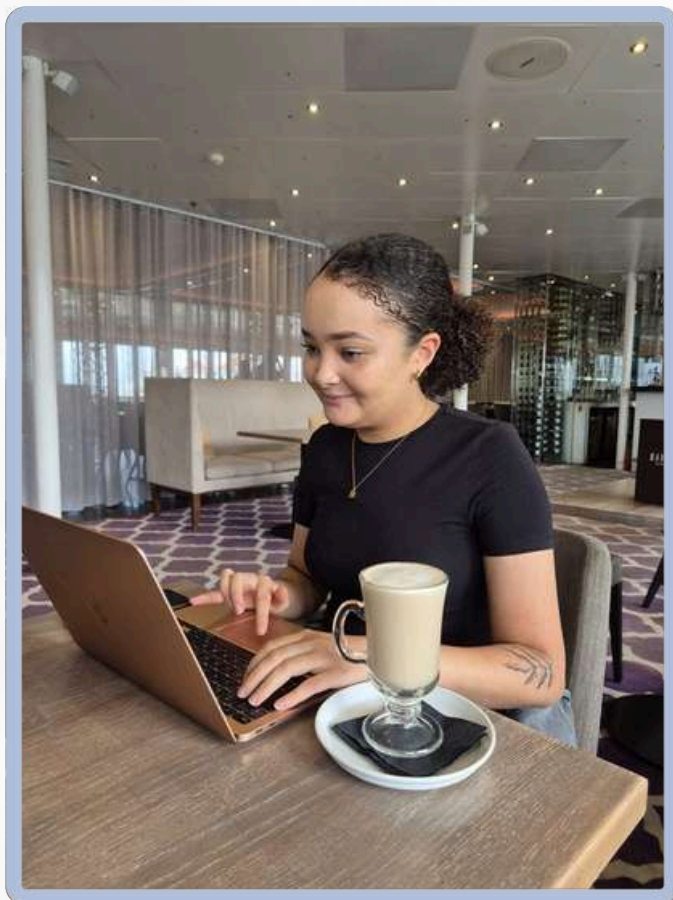

Work smarter, not harder.

These shortcuts will speed up your design process:

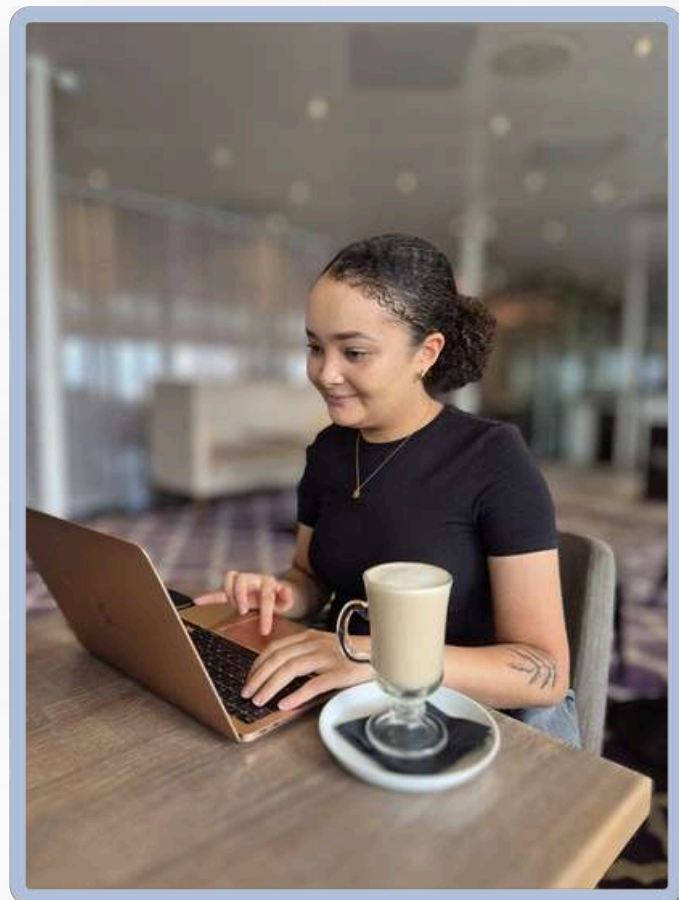

- Type T to add text
- Type R to add a rectangle
- Type L to add a line
- Type C to add a circle

3/ Background blur ✨

Click your image > Edit > Effects > Auto Focus > Adjust the blur.

BEFORE

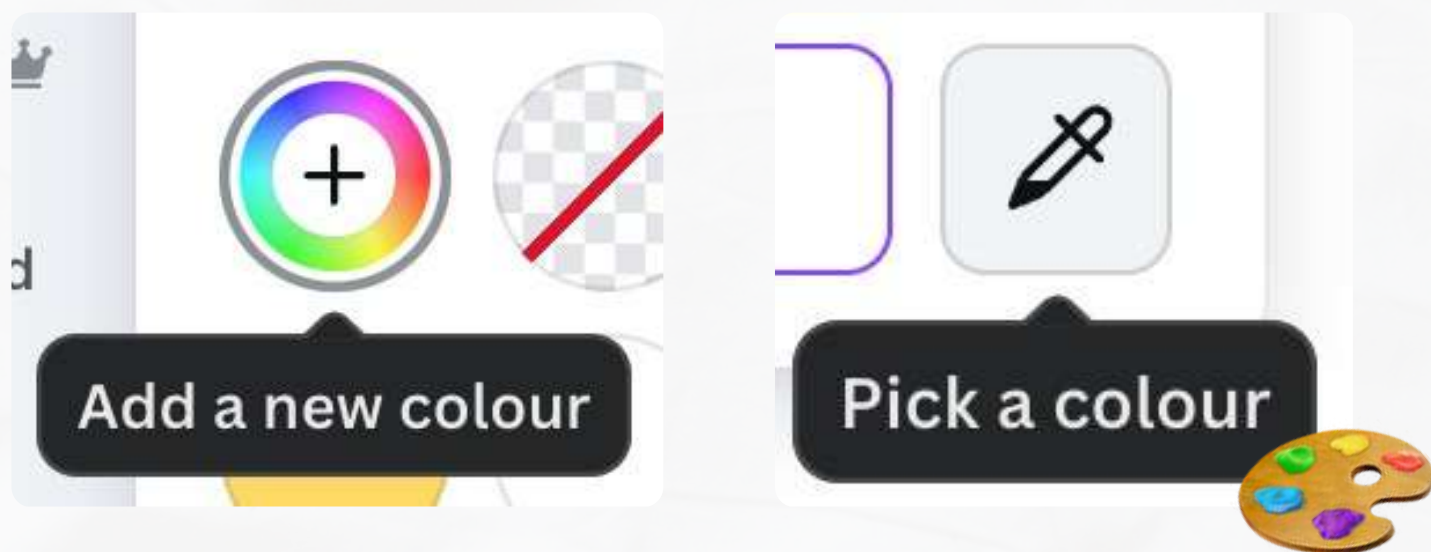

AFTER

Great for making subjects stand out!

4/ Colour picker

No more guessing hex codes!

Click any element > Colour > Add new colour > Eyedropper tool, then grab any shade straight from your design.

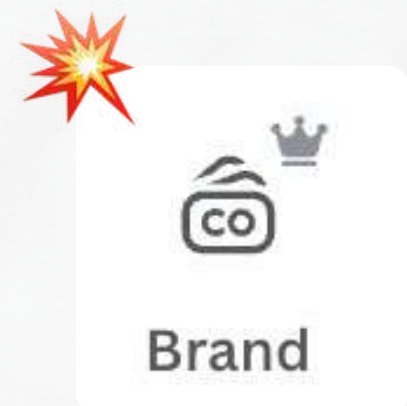

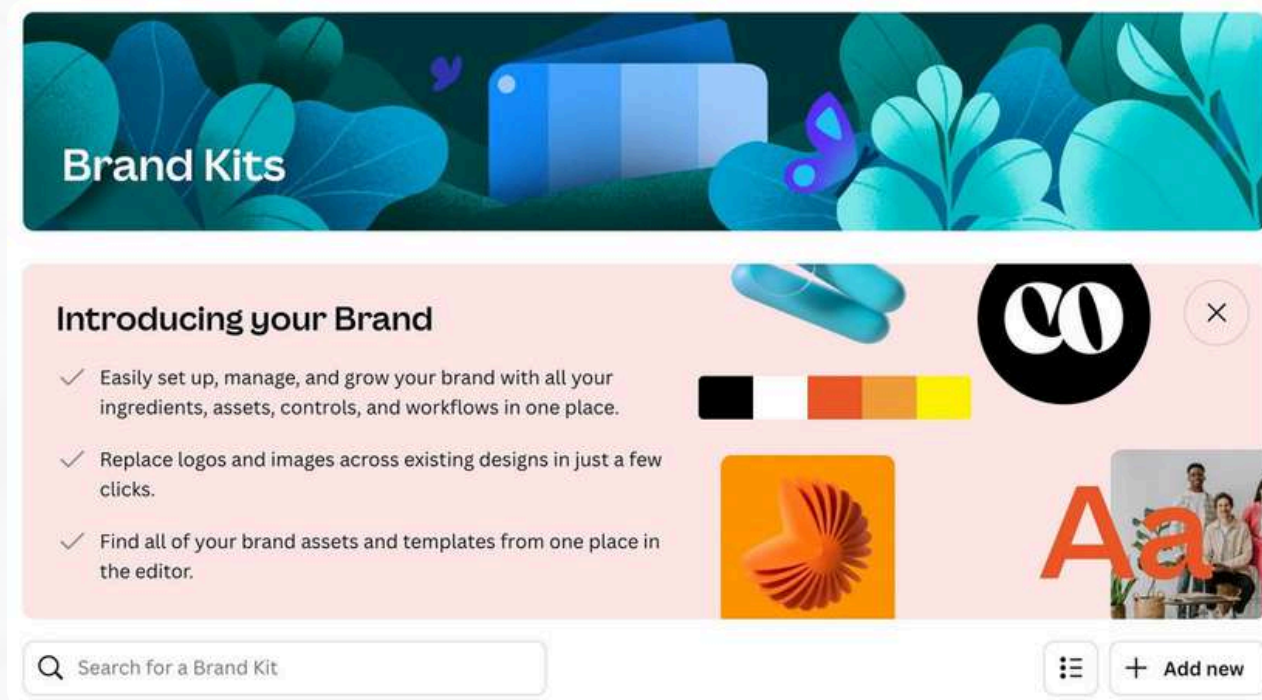

Super useful for keeping everything matchy-matchy with logos, images & brand colours.

5/ Brand kit

Stop hunting for brand colours & fonts every single time.

Go to Brand Hub > Upload your logo, fonts & colours, then apply them with one click when designing!

*Only on
the Pro
version*

No more hunting down the right shades or re-uploading logos.

6/ Copy & paste across designs ✨

Working on multiple Canva files?
You don't need to re-upload anything.
Just copy (Cmd/Ctrl + C) from one
Canva tab & paste (Cmd/Ctrl + V) into
another. Or right-click Copy, switch to
another design, then Paste.
I use this hack so much – so handy!

7/ Mockups

Make your design/image look like it's on a T-shirt, laptop, or phone in seconds.

Click the image > Edit > Apps > Mockups > Pick a frame.

3 things you probably **didn't know** you could do in Canva: 🙄🙄

1/ Instant colour palettes

Let Canva pick your colours. Go to Apps > Colour Palette Generator, upload an image & get a palette.

2/ Record yourself

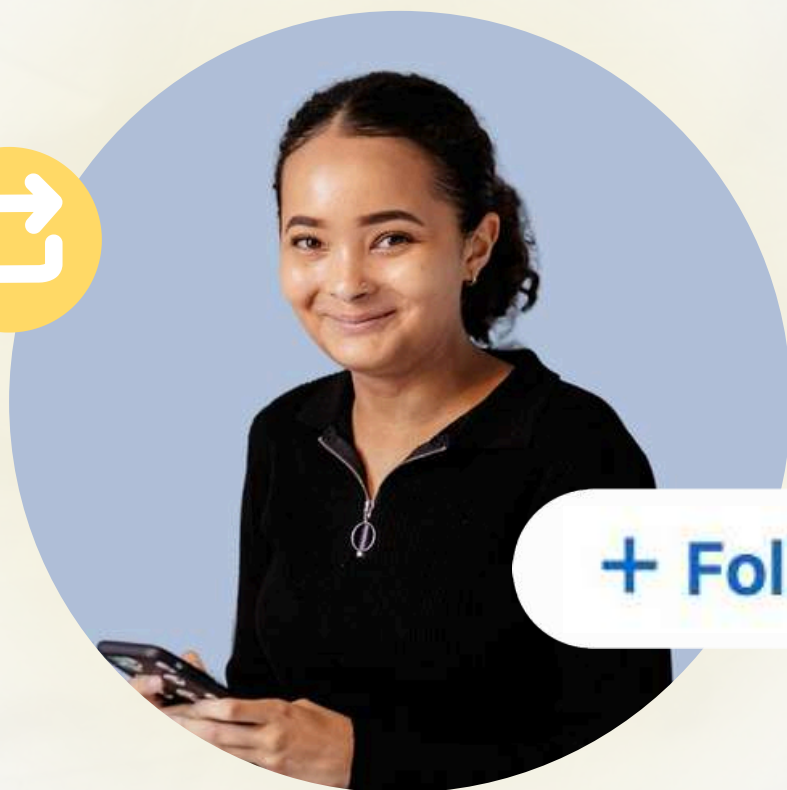

Need a voiceover or screen recording? Simply go to Uploads then hit record yourself!

3/ Edit PDFs

Upload any PDF & edit everything – text, images, fonts, whatever you need.
